18BI · Week 1 — What was our revenue?

Business Intelligence · FNSPE CTU in Prague · 2026

On your own. Ten minutes. Pen and paper — no laptops, no phones.

You are the analytics team. The CEO wants one number: **what was our revenue?** Below is everything the company's systems will give you. Work out an answer, and write down the rule you used.

ORDERS — ORDER LINES

order	line	product	qty	unit price (net)	discount	shipping	VAT	status
O-1	1	Running shoes	2	1 000	0	100	21%	completed
O-1	2	GPS watch	1	3 000	500	100	21%	completed
O-2	1	Wetsuit	1	5 000	0	0	21%	completed
O-3	**1**	**Trail shoes**	**3**	**1 000**	**300**	**100**	**21%**	**CANCELLED**
O-4	1	Bike helmet	1	2 000	0	100	21%	completed
O-5	**1**	**Goggles**	**2**	**1 500**	**0**	**150**	**21%**	**PENDING**
O-6	1	GPS watch	1	4 000	0	100	21%	completed

REFUNDS — BOOKED SEPARATELY, DAYS LATER

refund	order	booked	amount (net)	reason
R-1	O-4	three weeks later	2 000	damaged

NOTES FROM THE SYSTEMS TEAM, SUCH AS THEY ARE

- **unit price (net)** excludes VAT. The product catalogue stores prices *including* VAT.
- **shipping** is charged once per order, and repeated on every line of that order.
- Cancelled and pending orders stay in the table. Nothing is ever deleted.
- Refunds are not subtracted anywhere. They live in their own table.

Our revenue was _____ CZK

because I counted _____

and I excluded _____

Finished early? Look at your neighbour's number. If it differs from yours, can you prove one of you wrong — or can you only disagree?
